# Overview

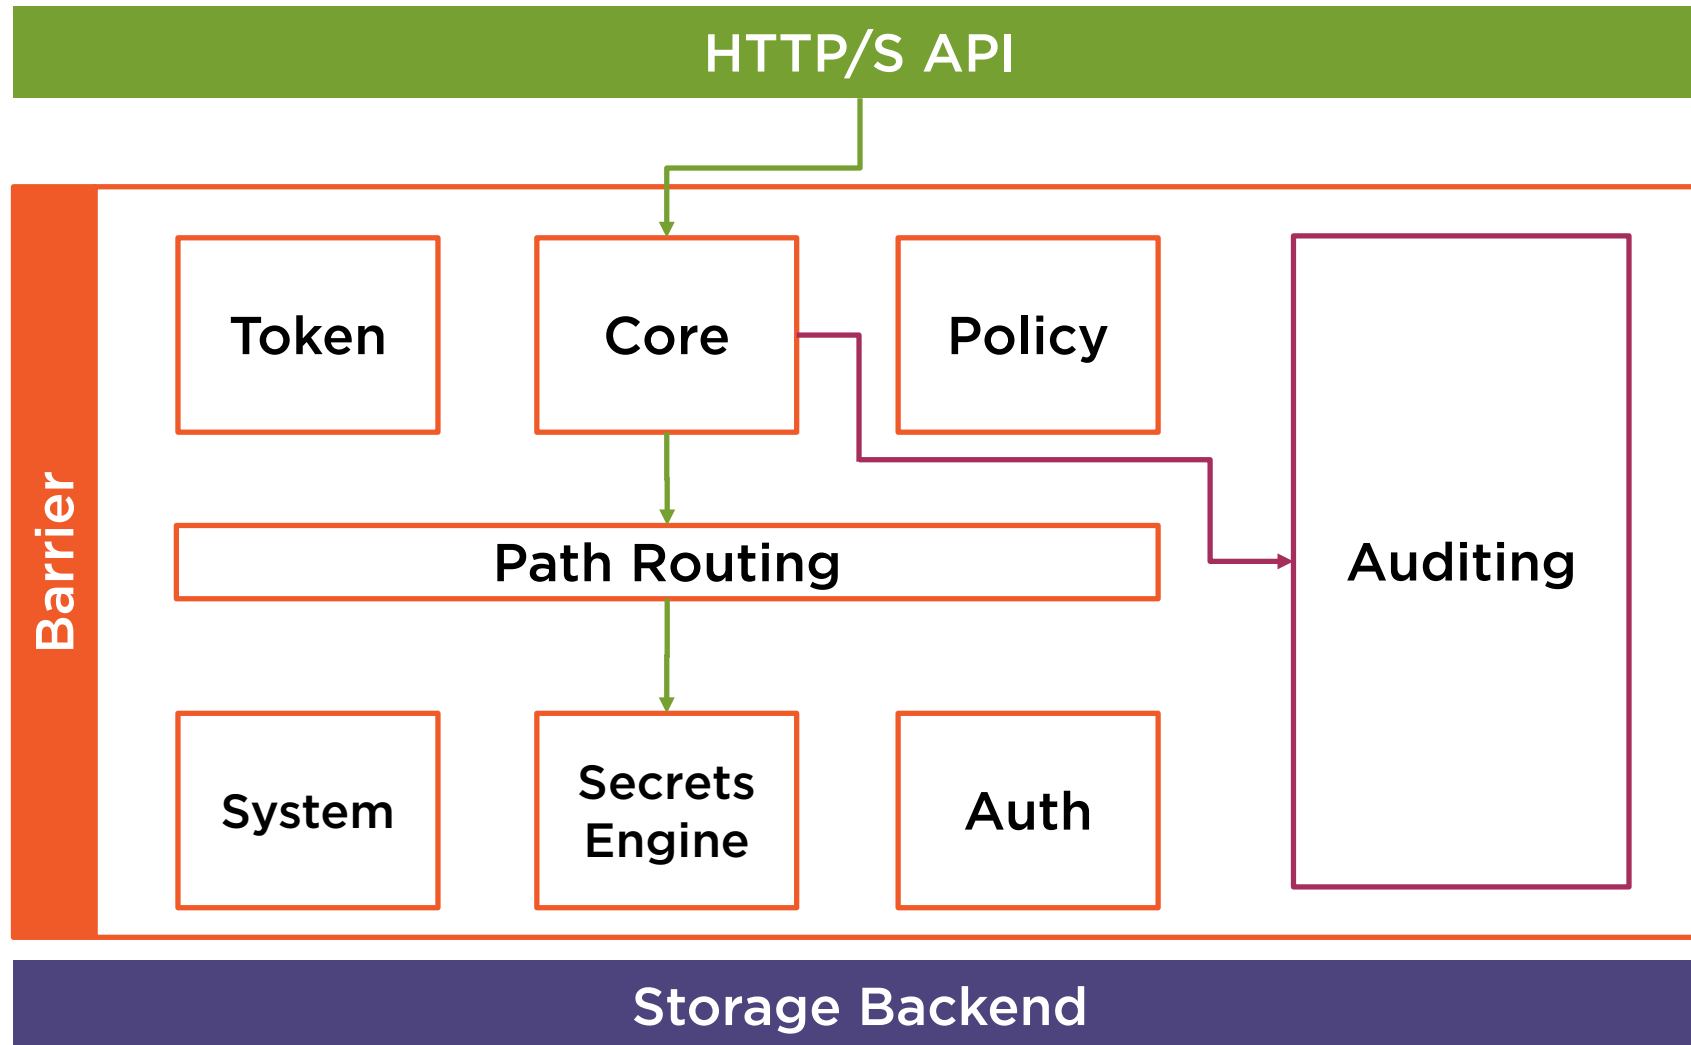

**Auditing architecture**

**Enabling auditing**

**Reviewing audit logs**

# Vault Server Architecture

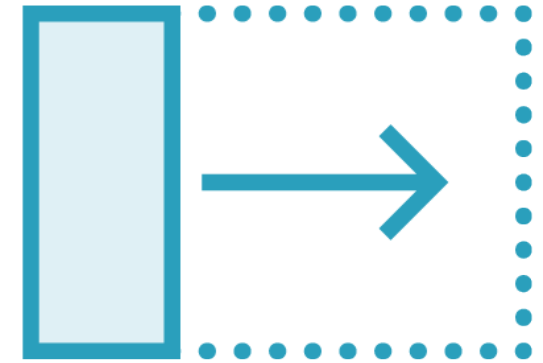

# Auditing Device Types

File

Syslog

Socket

# Audit Commands

#Enable audit device

`vault audit enable --path=vault_path [type]`

#Disable audit device

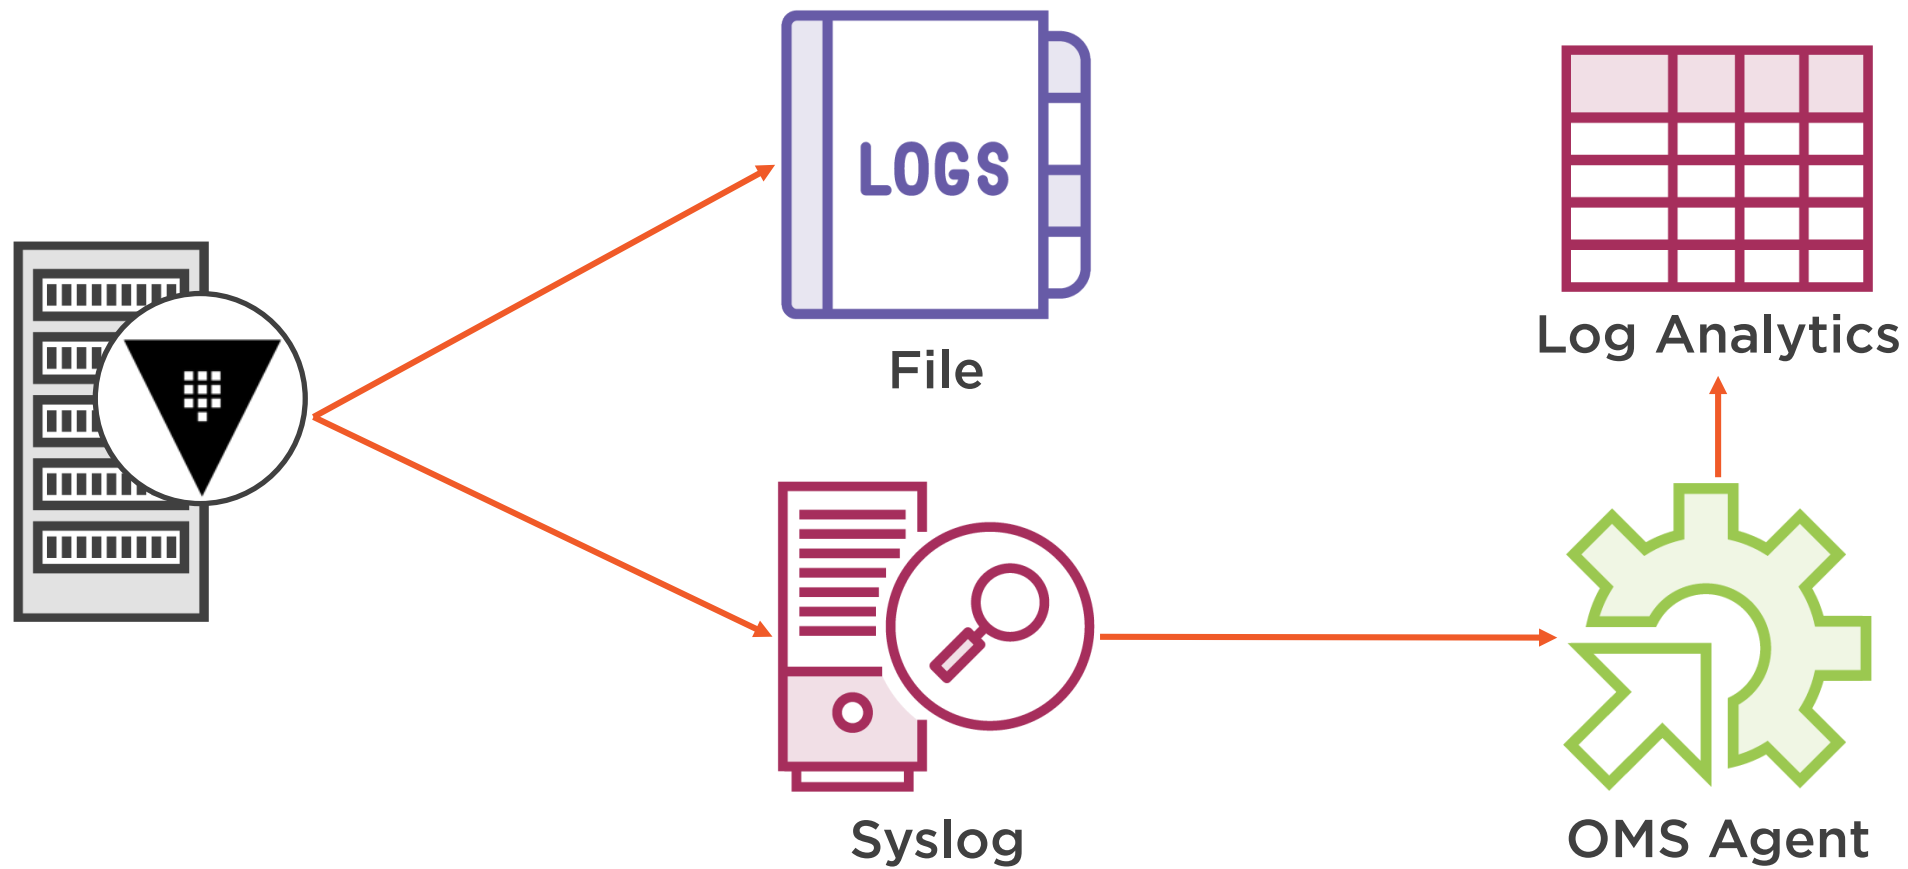

`vault audit disable [path]`

#List audit devices

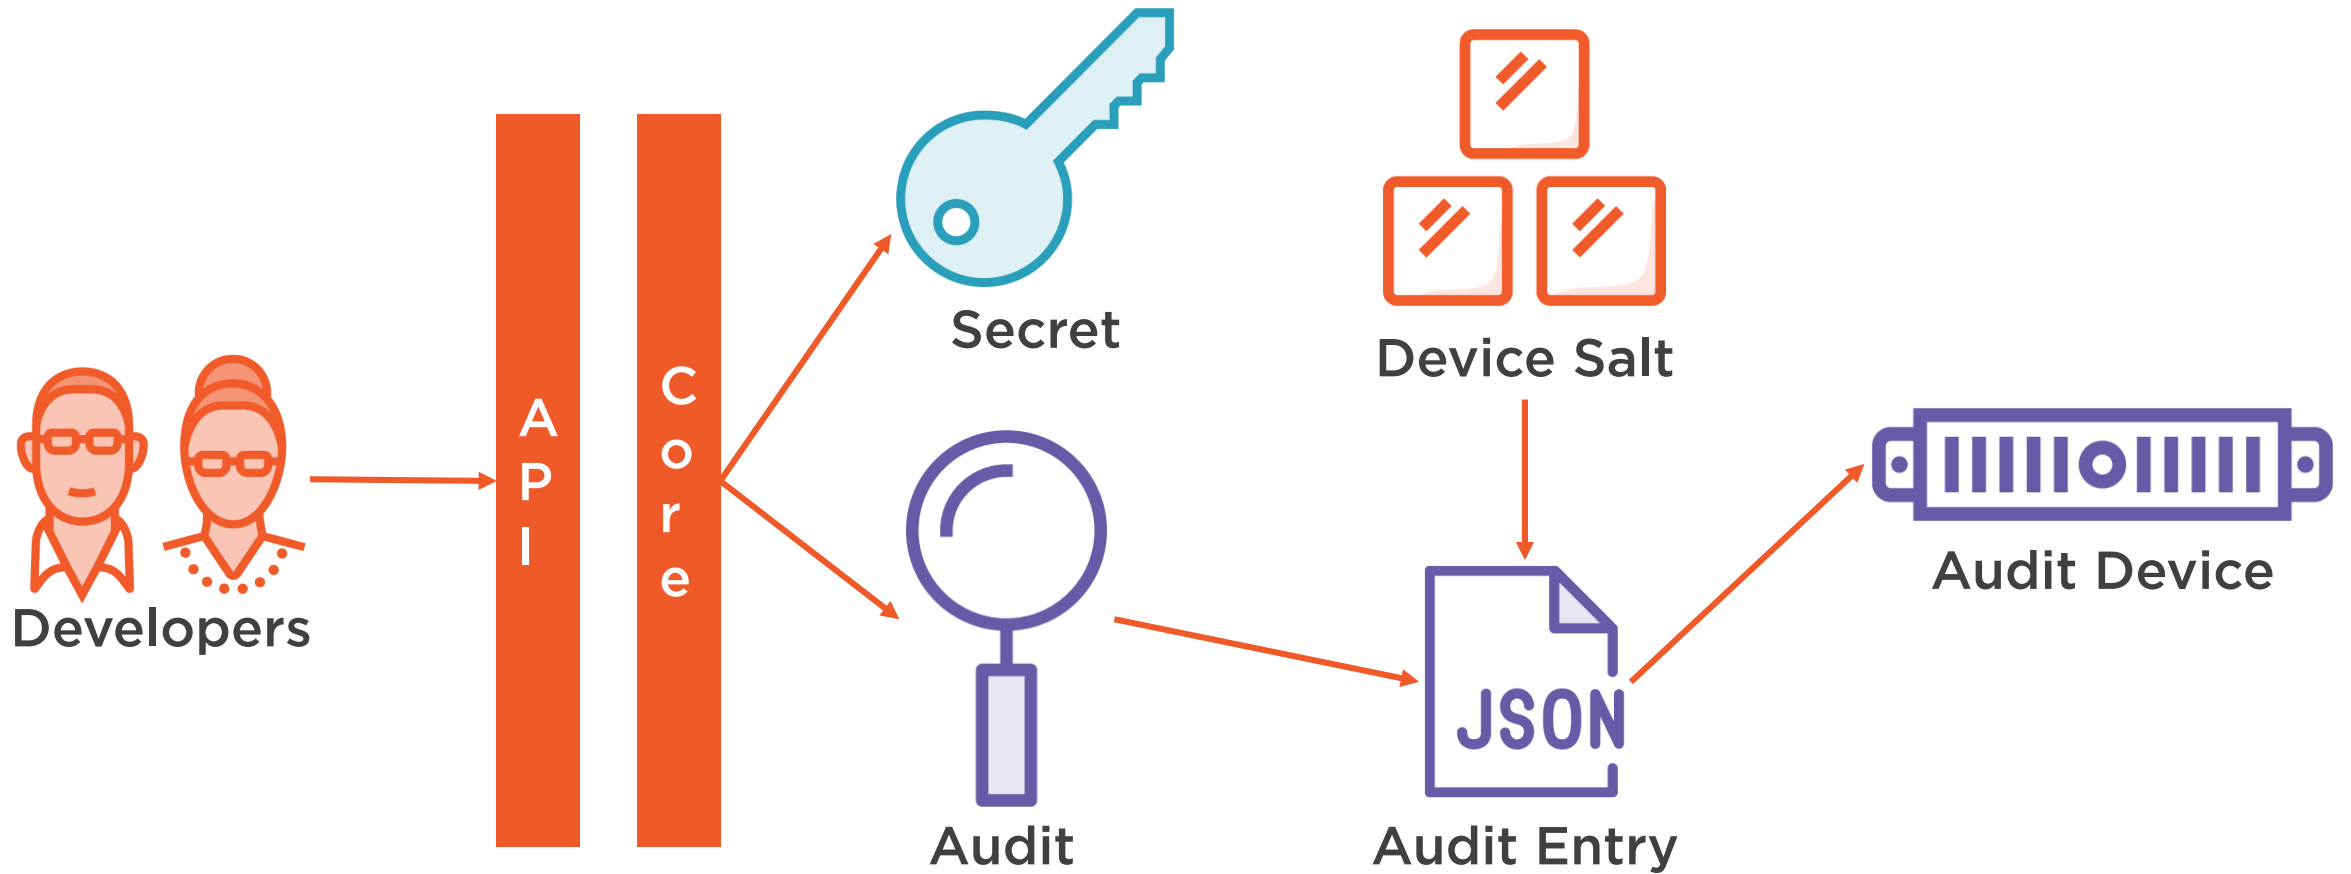

`vault audit list -detailed`

# Audit Scenario

# Reviewing Audit Data

# Conclusion

**Everything is audited**

**Auditing must be available**

**Sensitive data is hashed**
